

Product Data Sheet

Mobilarma SF Thin Oil Film Corrosion Preventative

Product Description

Mobilarma SF is a solvent free, oil based, corrosion preventative designed to give medium term rust protection to steel items during storage and transit.

Benefits

Mobilarma SF is a solvent free oil based product which offers the following benefits:

- High covering capacity.
- Easily removed as and when required.
- No evaporation from treatment tanks.
- High flash point.

Application

Mobilarma SF is an oil based rust preventative designed to provide effective medium term protection to steel items in storage or transit. Mobilarma SF may be used for the internal and external protection of machinery, small mechanisms, components and sheet steel where solvent deposited products are not suitable. Mobilarma SF can be applied by dipping, flooding, spraying or brushing. Where necessary it can be removed by hydrocarbon solvents or suitable alkaline cleaners.

Health and Safety

Based on available toxicological information, it has been determined that this product poses no significant health risk when used and handled properly.

Details on handling, as well as health and safety information, can be found in the Material Safety Data Bulletin which can be obtained through Mobil Oil Company Ltd., by telephoning 01372 22 2000.

Typical physical characteristics are given in the table. These are intended as a guide to industry and are not necessarily manufacturing or marketing specifications.

Typical Characteristics

	Mobilarma SF
Relative Density 15/4 °C	0.88
Film Type	Thin oil film
Film Thickness, microns	5.0
Coverage, m ² /litre	200
Flash Point COC °C, min.	118
Viscosity, cSt at 40°C	25
Viscosity, cSt at 100°C	5
Corrosion protection:	
indoors	9 months
covered outdoor	3 months
outdoors	Not recommended
